

External Domain Tracker

I want to use your DNS for domains managed with other Registrars, how do I do that?

In order to use our DNS for domains listed in the External Domain Tracker and managed via other registrars we first need to verify that you are the owner of the domains. In order to do so you need to request ownership verification via the tracker and then click on the link in an email we will send to the listed owner as per the WHOIS.

Unique solution ID: #1099
